

Temporary access impacts

**Tarooona Foreshore Track Pipeline upgrades,
Monday 1 June to Friday 19 June (weekdays)**

Part of the Tarooona Foreshore Track near the Institute for Marine and Antarctic Studies (IMAS) campus will be impacted between 1 June and 19 June (weather permitting) while contractors undertake upgrades to the intake pipe nearby.

To support this work, a 150mm diameter hose will at times be crossing the path on weekdays between 7am – 4pm, limiting access for some users. Safety signage will be displayed for community awareness. We apologise for any inconvenience caused.

The work is part of improvements enabling IMAS to conduct safe and sustainable operations including research and species conservation. Thank you for your understanding.
